Learning history is an important part of our life. Even though we live in history ourselves, we should know about the past too to understand processes the world went through. But which history is better to study? Ancient or modern? This topic was already discussed in a radio interview and there was a statement that said: "modern history is more factual and therefore less uncertain. It is true that during modern times people are more technologically advanced than in the medieval period and before that. However, we shouldn't forget that it is thanks to ancient era there was foundation for the future evolution of sciences and technologies. That means ancient history can teach us how the progress works and how people change along with it. Another statement that should be mentioned is: "ancient history contributed to our cultures." There is no doubt in this fact, since it is unarguable that without knowledge of ancient times people wouldn't have the cultural identity they have now. But it is also important to say that modern era is the time when many unknown cultures become known and acknowledged. Because of that people are more confident about their ethnicity and respectful towards other ethnicities. This process forged cultural groups we are a part of. All in all, it is genuinely hard to separate modern history from ancient because of their strong connection. However, after thinking of the facts written above, ancient

Hello, sir! Here is the report of the states our school's Facilities
are in: classrooms, a cafeteria, small gym and big gym, an IT
center.

Classrooms. After the refurnishing and other repairs that have
happened last year, the classrooms look as good as new. The only
problems here though are the shaky student chairs, chewing gum
that got stuck to desks and a few holes in the curtains in the
classrooms located on the ground and first floors.

Cafeteria. Because of the high school building closed, students
have to eat at the big gym, where tables, chairs and a buffet
were organized. However, the food is given in plastic containers
and tastes plain, causing waste and a lot of plastic to recycle.
Perhaps, the better decision would be to ask student to bring
food from home.

Small gym and big gym. Big gym is used as a cafeteria and
children have to use small gym for PE lessons. Sadly, because
of the huge amount of children in the primary school building,
they don't get much PE lessons. When Spring comes, I suggest
bringing PE outside, so that kids can get fresh air and do
sports.

IT center. The room is in great state technology teachers care
about the computers and make sure to charge laptops every
day. Since a lot of high scholars study alongside primary
and middle school students, it would be great to bring more
higher desks for them to sit at.

This is all for now, hopefully, the report I've written will
improve the situation at our school.
