Hello, I wanted to present the course I have been attending for 4 months. It is "Yandex IT course", which I find really attractive due to many reasons.

First of all, we attend the special place on Bolshaya Sadovaya street, called "IT kub", where you can find numerous professional computers for programming. The place itself is very bright due to the absence of the curtains blinders. It looks great as well. There is a fast food restaurant nearby, in case you want to eat. Classes last 2 hours, which is not a lot, from my point of view. The mentor is kind-hearted and ready to give you a hand at any moment. Furthermore, the classes are free, the only thing you need to do is to pass an entrance exam, which is a piece of cake.

As for acquiring new information, the course is also brilliant. Every new lesson we learn something new, so it won't be tedious for you to attend them. Information is given step by step so everyone could keep up. Sometimes it might look easy, but it depends on the student, not the course. We always do interesting extra-curriculum tasks to check whether we are ready for a test or not. The amount of the new information I get is big, which I find really cool. For example, my favourite topic is PIL, a language that allows me to print anything I want.

To sum up, I definitely recommend this course to anyone who wants to take up programming. All essential data can be found on the website of "Yandex Lyceum".
