3.c +

4.c -

5.b +

## Writing

For and against: teenagers  
constantly using smartphones

gr.

Many people believe that teens use their phones too much. Even though there might be some positives of this, there are a lot of problems that are caused by constant usage of mobile phones by teenagers.

One of the biggest drawbacks is that if you use your phone for too long daily, it can make your eyesight worse. Your sleep schedule can also get ruined if you use your phone in the late evening or at night. Another minus is that you don't talk to anybody in real life if you're always on the phone.

Despite these serious negatives, there are still a few good things about this situation. One of them — children participate in dangerous outdoors activities less. Before phones became a common thing between teens, they often explored abandoned buildings, did shoplifting, played with fire and fireworks or even were part of gangs. Now, with the spread of technology, kids simply find prefer social media and video games, since they're ~~as~~ fun and safer at the same time.

Other good things  
ww  
Teens

To sum up, teens' smartphone addiction is a controversial topic. Personally, I think that smartphones are a good thing, but they should be used exclusively for doomscrolling through social media and playing games.

Is it positive or negative?
