The Influence of Social Media

In our modern world, the amount of teenagers that use social media is extremely high and a lot of people are concerned if it should be considered dangerous. I think that social media has more negative effects than positive ones on teenagers.

First of all, teenagers might lose control of time if they use social media for too long. This could cause lack of knowledge due to the little amount of time they spend on studying and ~~therefore~~ in the long term, ^{not passing} ~~missing~~ the exams. Also, spending too much time on social media backfires on the health of its users and causes loss of vision and obesity. Teenagers should control their usage of social media to prevent all this ~~to happen~~ from happening.

Secondly, teenagers should keep in mind that social media is not a safe place at all. Internet crime rate is currently at the highest point. Hackers try to steal your personal information, money or even leak your secrets. It is really hard to control the safe environment in social media.

To sum up, social media has a negative effect on the teenagers and it requires control of ~~their~~ ^{their} guardian a guardian to prevent them from being affected.
