## Mysterious Monster

At different times, thousands of people say that they have seen a large animal in the famous lake called Loch Ness in Scotland. For many centuries, people have tried to catch it. People who live there always talk about the mysterious animal in the lake, and many of them believe that it is still there today.

In 1933, John McGregor, a local businessman, saw that the lake began to bubble, and a huge animal with two humps came out of it.

After that, scientists examined the lake with underwater equipment and tried to find out what kind of animal lived there. Of course, they haven't found it yet, because the lake is so deep and so dark.

Tourists from all over the world have visited Loch Ness, they hope to see the monster. They have even given it a nickname "Nessie". Many people even show photos of the monster, but they are usually photos of the pictures of the monster. Scientists suppose that the Loch Ness monster is a dinosaur, which has survived since the Ice Age.

Here is a description of the monster:

- Length: About 50 metres.
- Body: With two humps.
- Half horse, half snake and quite small.
- Long and thin, like a giraffe.
- Yellow-brown.
- People think that it eats sheep on land and underwater plants.
- Shy, doesn't want to be seen.
- Lives in the deepest and coldest parts of the lake about 1 km from the surface.

Dear Ben,

I am happy to read your letter. You asked me some questions in your last letter. Now I am going to answer them. I know that fast food is bad for people. I don't like hamburgers, but I like pizza and food from "SubWay". I don't eat it very often. For lunch I usually have salad. It is very cheap in my school.

I also like to cook. Every Sunday I cook cakes, pancakes or cookies. My brothers like it. Write about food you like and cook. Write me as soon as possible. )))

Your Polina.
