- c. admitted
- d. promised

26. I _____ my umbrella at home on the table.

- a. left
- b. forgot
- c. missed
- d. remembered

IV. Reading

Read the text and *True, False* for the following sentences.

We need energy to heat our homes, cook and clean for our families and for transport. It allows us to live a comfortable and easy life. However, if we do not use this energy properly, we will soon run out. Luckily, there are things we can all do to help our planet and conserve our resources.

To begin with, much of the energy used at home goes to heating or cooling our homes. A simple way to help conserve energy is by lowering the thermostat by two

degrees in the winter and raising it by two in the summer. By doing so, you will not only lower your heating bill, but you will also reduce the amount of carbon dioxide that enters the atmosphere.

Another way you can save energy at home is by buying energy-saving appliances. Appliances like washing machines and cookers use a great deal of gas or electricity to work. When shopping for new appliances, look for the energy-saving sticker; they might be a little more expensive to buy, but they help save energy, and in the end will help you save money on your bills.

A lot of energy is used by means of transport too. One of the many ways to achieve low energy usage is to leave the car at home and catch the bus or the train to move around the city. Fewer cars in the street means less traffic and it will not only help save energy, but it will also reduce the amount of air pollution.

In the end, it is up to every individual to take responsibility and change their daily habits. If everyone does their part – then we can help save energy and our planet's resources.

27. Everyone can participate in conserving energy and saving the planet.

- a) True
 b) False

28. Heating and air conditioning influence the amount of carbon dioxide released into the air.

- a) True
 b) False

29. Home appliances don't need much energy to run.

- a) True
 b) False

30. When travelling, the only way to save energy is to use public transport.

- a) True
 b) False

31. You need to change your daily routine to save energy.

- a) True
 b) False

32. If we use energy properly, we will soon run out.

- a) True
 b) False

33. Energy-saving stickers are efficient, but a bit expensive

- a) True
 b) False

34. Traffic congestion contributes to the air pollution.

- a) True
 b) False

35. Regulating thermostat at home is dangerous.

- a) True
 b) False

36. Saving energy will help you reduce your heating bills.

- a) True
 b) False

V. Writing

You have 30 minutes to do this task. You are going to write about shopping spree. Write no more than 100-120 words.

Remember to write:

- introduction
- what shops teenagers prefer to visit;
- what things you have bought online;
- what you think about branded goods;
- what item you have bought recently;
- what you like/dislike in the process of shopping;
- conclusion.

Nowadays, teenagers get used to visit shopping centers very often, especially in big cities.

Teens prefer to visit such shops like technique, anime, comics and other "teens" shops.

I also buy a lot of things in these stores, particularly online. For instance, I have recently bought a new joystick for my Playstation.

I think branded goods are useful, but in most cases you pay too much extra money only for brand, so there are lots of non-branded items and their quality is also nice.

I have recently bought a new keyboard in DNS shop.

I mostly like shopping, but I hate staying in queue, so I prefer to buy things online.

In conclusion, I'd say that now online shopping is developing very fast and it's preferred by teens.
